IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: James H. VanGilder
Title: TELECOMMUNICATIONS GRAPHICAL SERVICE PROGRAM
Serial No.: 10/701,470
Filing Date: October 30, 2003
Attorney Docket: 200314087-1 (1964-56-3)

**DECLARATION OF PRIOR INVENTION IN THE UNITED STATES PURSUANT TO 37
C.F.R. § 1.131 TO OVERCOME A CITED PUBLISHED U.S. PATENT APPLICATION**

TO THE COMMISSIONER FOR PATENTS:

This Declaration establishes completion of the invention in the United States on a date before 3 January 2002, which is the filing date of U.S. Patent Application Publication 2003/0126584 A1 to Creamer *et. al.*

200314087-1 (1964-56-3)

I, James H. VanGilder, hereby declare the following:

- 1) I am the sole inventor of the invention described and claimed in U.S. Patent Application Serial No. 10/701,470 ("470 application"), which was filed on October 30, 2003. Before 03 January 2002, I had conceived of and reduced to practice a telecommunications graphical service program in the United States. Specifically, I had conceived of and reduced to practice a telecommunications graphical service program that had the features of claims 1-20 as originally filed.
- 2) This telecommunications graphical service program, which I had conceived of and reduced to practice before 03 January 2002, included a method in a graphical user interface for a computer displaying objects for designing a service graph using a plurality of service independent building blocks as shown and described in the '470 application. The method includes displaying a canvas object, displaying a toolbar object, displaying a menu object, and displaying a working folder tabs object that displays in one mode service independent building blocks that may be placed onto the canvas to design a service graph. Attached Exhibit 1 is a User's Guide of the telecommunications graphical service program showing in Figures 4-1 and 5-1, for example, display shots showing each of the elements recited in independent claims 1, 10, and 15. The User's Guide of Exhibit 1 was prepared prior to 03 January 2002.
- 3) "Reduction to practice" as used herein means designing the telecommunications graphical service program, including drafting on paper or through computer programming the components and methods of such program and interconnections and functionality of such components.
- 4) Exhibit 1 is a copy of pages that were generated before 03 January 2002 and includes descriptions and figures showing example screen shots of an embodiment of the invention described in '470 application. Exhibit 1 includes Figure 4-1 on page 4-1, which is a screen shot showing the canvas object, toolbar object, menu object, and working folder tabs object recited in independent claims 1, 10, and 15 according to one embodiment of the invention disclosed in the '470 application. The working folder tabs object on the left side of

Figure 4-1 displays in one mode service independent building blocks that may be placed onto the canvas object—to the right of the working folder tabs object—to design a service graph. Exhibit 1 shows each and every element of claims 1, 10 and 15 as originally filed.

5) Pursuant to MPEP § 715.09, I am seasonably submitting this Declaration before receiving a final rejection of the patent '470 application.

6) I further declare that all statements made herein of my own knowledge are true; that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like, if so made, are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
